The purpose of this book is to answer four questions.

First, is American education in crisis?

Second, is American education failing and declining?

Third, what is the evidence of the reforms now being promoted by the federal government, and adopted in many states?

Fourth, what should we do to improve our schools and the lives of children?

Special thanks to Mac’s Backs on Coventry and Appletree at Cedar Fairmount for selling the books at discounted prices. Shop local.

Sessions will include large group start and summary. The majority of each session will be in table discussions with a few guided questions.

Come for all sessions or just one. Let’s talk as a community.
